To whom it may concern,

I am interested in learning more about your field and career as a NICU nurse. I have always been interested in pursuing this career, as it aligns well with what I am passionate about. I am currently a senior in high school, with valuable leadership skills and experience in the workplace.

Pursuing a career in the medical field has always interested me. I have taken various Biology courses, as well as an Anatomy class that got me more enveloped in the career. Additionally, I work at a skilled nursing facility that has equipped me with the knowledge of working with patient care. Throughout the years, I have also volunteered with Kaiser Permanente as a junior volunteer where I was assigned various tasks such as:

- Delivering gifts to patients
- Taking pictures for patient profiles
- Printing papers/ making copies
- Running errands for Emergency Room
- NICU cuddler

In addition to my experience and personal qualities, I have a solid passion for the care of children and newborns, specifically critical care newborns. I myself was a baby in the NICU, and also experienced the NICU firsthand when my sisters were in there. It takes a strong heart and consistent growing passion to take care of these tiny babies. I believe that I possess these qualities and would make a great asset to your team.

Best regards,

Abigail Thompson
